Art Unit: 1743

DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-22, drawn to a combinatorial chemical synthesis reaction tool, classified in class 422, subclass 102.
 - II. Claims 44 and 45, drawn to a method for exchanging fluids withing reaction vessels, classified in class 436, subclass 50.
 - III. Claim 47, drawn to an integral heater and stirrer, classified in class 366, subclass 261+.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II; II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as a mixing device for paints or by hand.
- 3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed in group I does not require the integral of heater and stirrer for patentability. The subcombination has separate utility such as a stirrer for mixing beverages.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the

Serial Number: 08/872,097

Art Unit: 1743

search required for one group is not required for others, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Peter H. Priest on June 17, 1998 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Long V. Le whose telephone number is (703) 305-3399.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0651.
